Thanks for filling in this form: **PhD Candidate Profile Evaluation Intake Form**

Here's what was received.

PhD Candidate Profile Evaluation Intake Form

For prospective PhD candidates seeking academic mentorship and application strategy assessment.

Welcome to your PhD profile evaluation. To help me conduct a rigorous and customized assessment of your academic standing, research capability, and institutional fit, please fill out this questionnaire. Your responses will serve as the foundation for our upcoming 30-minute 1:1 virtual strategy session.

Instructions: Please fill in the shaded "*Candidate's Response*" cells in the table below. Be as detailed as possible to allow for an accurate and high-value evaluation.

Your email address (**athiyamanpro@gmail.com**) was recorded when you submitted this form.

1. Full Name

*

Athiyaman M

2. Specific Area of Research

Interest

What specific sub-fields, methodologies, or research questions are you passionate about investigating? (e.g., Deep Learning in Medical Imaging, Behavioral Corporate Finance, Post-Colonial Literature)

*

My research interests focus on Artificial Intelligence in Healthcare, particularly the application of Machine Learning, Deep Learning, and Large Language Models (LLMs) in medical imaging, orthopedic healthcare (bone and musculoskeletal disorders) and mental health. I am interested in developing AI-driven solutions for diagnosis, clinical decision support, predictive analytics and personalized healthcare.

3. Academic Background &

GPA

List all university-level degrees (Bachelor's, Master's), institutions, graduation years, and GPAs/grades.

Highlight any key advanced math, theory, or field-specific courses.

*

Bachelor of Engineering (B.E.) in Electronics and Communication Engineering (ECE)

IFET College of Engineering , Affiliated to Anna University, Tamil Nadu, India

Graduation Year: 2025

CGPA: 8.71/10.00 (First Class with Distinction and Rank Holder)

Honors Specialization: Artificial Intelligence

Relevant Coursework:

Artificial Intelligence and Machine Learning, Machine Learning Algorithms, Neural Networks, Deep Learning Architectures, Computer Vision, Fuzzy Logic Systems, Data Science Analytics, Python Programming, Probability and Statistics and Computer Networks

Academic Focus:

My undergraduate studies combined a strong foundation in electronics, mathematics, signal processing and computing with advanced coursework in Artificial Intelligence, Machine Learning, Deep Learning, Computer Vision and Data Science, which motivated my interest in AI-driven healthcare research.

4. Research Experience &

Publications (if yes/no you can mention)

Detail your previous research
engagements: theses, working papers,
peer-reviewed articles, conference
presentations, research assistant (RA)
work, or core technical industry
experience

*

Research Experience & Publications:

1. Design of Passive Optical Network (PON) for Hospital Building Management: Enhancing Data Transmission Using Free Space Optics (FSO)

Status : Conference paper accepted and presented - publication pending.

The work focused on improving hospital network infrastructure through the integration of Passive Optical Networks and Free Space Optics for reliable, scalable, and secure data transmission.

2. AI-Based Analysis of Hospital Bed Utilization Patterns for Patient Readmission Prediction (Tamil Conference Paper)

Status : Conference paper accepted and presented - publication pending.

The study explored machine learning techniques for predicting hospital readmissions using hospital bed utilization and patient-related healthcare data.

3. Mental Health Risk Detection via Explainable AI (XAI): A Multi-Model Benchmark with Contextual Embeddings

Status : Research paper submitted to an international conference and currently under review.

The work investigates explainable AI approaches for mental health risk assessment using contextual language embeddings and multiple machine learning models.

Industry Research & Development Experience:

Worked on AI-driven healthcare applications, examination analytics systems, research paper summarization, and digital governance solution proposals at C-DAC and IIT Madras.

5. Target Countries & Specific**Universities**

Which regions (e.g., USA, UK, EU, Canada) or specific universities/departments are you aiming for? Have you identified or contacted any potential faculty advisors?

*

I am currently in the early stages of exploring PhD opportunities and have not yet finalized a specific list of universities or contacted potential faculty advisors. My primary interest is in research-intensive universities that offer direct-entry PhD programs in Artificial Intelligence and Healthcare AI.

At present, I am particularly interested in institutions in Singapore, such as the National

University of Singapore (NUS). However, I am open to opportunities in other regions, including the United States, Canada, Europe, the United Kingdom, and Australia.

My preference is for fully funded PhD programs that provide tuition support and a research stipend. I am especially interested in programs where admission may be based on professional experience, academic and research potential, with GRE and IELTS requirements waived or optional when eligible.

6. Funding Requirements

Do you require fully funded offers (tuition waiver + monthly living stipend via TA/RA positions), or do you have external sponsorships, employer funding, or personal financial means?

*

I am seeking a fully funded PhD opportunity that includes full tuition coverage and a competitive monthly stipend. I do not have external sponsorship or employer funding.

7. Target Intake / Start Timeline

Which academic term and year are you targeting for enrollment? (e.g., Fall 2026, Spring 2027, Fall 2027)

*

I am open to the earliest available intake that aligns with my profile and funding opportunities, preferably Fall 2026 and Spring 2027.

8. Preferred Time for Free 30-Min 1:1 Virtual Session

Provide 2 to 3 distinct day/time slots when you are available for a video call (please include your time zone, e.g., Tuesdays at 3:00 PM).

*

03/JUN/2026 : 8:00pm - 10:00pm, 04/JUN/2026 : 8:00pm - 10:00pm, 05/JUN/2026 : 8:00pm - 10:00pm, or Weendends (Saturday or Sunday) : 9:00am - 10:00pm

9. Any Remarks?

Share any additional notes, specific questions, career constraints, or relevant personal/professional contexts that were not covered by the previous questions.

I am currently working as a Project Engineer at C-DAC for one year and have prior research and development experience in my current organization and also in my internship at HTIC, IIT Madras. My research interests lie at the intersection of Artificial Intelligence, Healthcare Informatics, Mental Health Analytics, and Medical Data Science.

I am actively seeking fully funded Direct PhD opportunities with tuition waiver and stipend support. I am particularly interested in research groups working on AI for healthcare, clinical decision support systems, explainable AI, digital health, and biomedical data analytics. I am open to opportunities across Singapore, Germany, Swiss and other countries that offer strong research environments and funding support.
